SUMMARY

Information Technology graduate with hands-on experience in Full-Stack Web Development using React.js, Next.js, Node.js, Express.js, TypeScript, and MongoDB. Experienced in building RESTful APIs, authentication systems, database-driven applications, and deploying full-stack applications. Currently exploring LLM Engineering using frontier APIs, prompt engineering, and API-based generative AI applications.

EDUCATION

P.E.S. Modern College of Engineering

Bachelor of Engineering in Information Technology — CGPA: 9.09/10

Pune, Maharashtra

Nov. 2022 – June 2026

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL, MySQL, SQLite

AI / LLM: LLM Engineering, Frontier APIs, Prompt Engineering, OpenAI API, Gemini API

Authentication: JWT, Auth0

Tools: Git, GitHub, Docker, Postman, Vercel, Render, Browserbase, Stagehand, PostHog

PROJECTS

JobPilot | *Next.js, TypeScript, Gemini API, Browserbase, Stagehand, InsForge* | [GitHub](#) | [Live Demo](#)

- Engineered an AI job discovery platform integrating the **Jooble API** and **Gemini API** to automate job searches and match scoring (0–100) against user profiles.
- Built an autonomous company research agent using **Browserbase** and **Stagehand** to crawl company web pages and synthesize structured dossiers (tech stack, culture, interview prep).
- Implemented resume parsing and dynamic PDF generation using **@react-pdf/renderer**, backed by **InsForge (Database, Auth, Storage)** with **PostHog** analytics.

Student Placement Portal (CSPS) | *Next.js, TypeScript, Node.js, PostgreSQL, Prisma, Auth0* | [GitHub](#)

- Developed student-facing home and notification interfaces for a placement portal serving **300+ students**, with job application and status tracking.
- Implemented **Auth0 domain-restricted authentication** and an eligibility engine across **6+ parameters**, reducing manual shortlisting effort by **80%**.
- Built TPO/recruiter workflows for job posting and student analysis, with Gmail notifications using company-specific subjects and pre-filled content, improving administrative workflow efficiency by **60%**.

Prescripto | *React.js, Tailwind CSS, Node.js, Express.js, MongoDB* | [GitHub](#) | [Live Demo](#)

- Built a full-stack doctor appointment platform supporting **2 user roles**—doctors and patients—with doctor discovery, specialty filtering, appointment booking, and cancellation.
- Implemented JWT authentication, MongoDB Atlas integration, Cloudinary file storage, and **8 REST API endpoints** for user, doctor, appointment, and payment workflows.
- Integrated **Razorpay** for online payments and deployed the frontend on Vercel and backend API on Render.

ACHIEVEMENTS & ACTIVITIES

- * **150+ DSA Problems:** Solved 150+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- * **Certifications:** Basics in Python – Infosys Springboard; MongoDB – Infosys Springboard.
- * **NSS Volunteer:** Led a team during college-organized service camps and social outreach programs.
